3.2.1 General

The following features will be available on all lines. Not all features are compatible with certain key sets and PBX systems.

A. Call Return

Allows a customer to automatically redial the telephone number of the last incoming call to that line, regardless of whether the call was answered, unanswered, or busy. After the recall is activated, and unless the number is blocked as described below, an announcement of the number is provided to the customer, who then has the choice of either continuing the recall by entering a code, or terminating the recall by hanging up. If the redialed number is busy, a distinctive ring alerts the customer when the number becomes available. If the telephone number of the last incoming call has been blocked through the use of a service such as Caller ID Blocking, the number cannot be redialed.

B. Continuous Redial

Allows a customer to automatically redial the last telephone number dialed. If the called number is busy, the number is redialed for a limited period of time. A distinctive ring alerts the customer when the called number becomes available.

C. Caller ID

Allows for the automatic delivery of a calling party's number to the called customer. The telephone number is displayed on customer-provided equipment.

D. Call Forward

This optional feature allows all calls directed to a telephone number to be routed to a user defined telephone number. The user is charged any applicable usage charges for the re-routed call. The user can activate/deactivate Call Forward and define a telephone number where all calls will be forwarded. Calls cannot be forwarded to an International Direct Distance Dialing (IDDD) number.

SECTION 6 - BASIC SERVICES AND RATES OFFERED TO FORMER TRINSIC CUSTOMERS

6.1 Call Timing for Usage Sensitive Services

Where charges for a service are specified based on the duration of use, such as the duration of a telephone call, the following rules apply:

- 6.1.1** Calls are measured in durational increments identified for each service. All calls which are fractions of a measurement increment are rounded-up to the next whole unit.
- 6.1.2** Timing on completed calls begins when the call is answered by the called party. Answering is determined by hardware answer supervision in all cases where this signaling is provided by the terminating local carrier and any intermediate carrier(s).
- 6.1.3** Timing terminates on all calls when the calling party hangs up or the Company's network receives an off-hook signal from the terminating carrier.

6.2 Trinsic Referral Program

Any existing Trinsic Customer who refers a potential customer to the Trinsic services listed below will receive a one-time credit should the referred customer subscribe to and remain a Trinsic customer for at least 30 days. The referred customer must provide the name of the existing Trinsic Customer who made the referral upon ordering the new Trinsic service. The credit is applied only once to the Customer's next scheduled bill and expires with that bill. The credit does not apply separately for interstate or intrastate service and cannot be redeemed for cash.

6.3.1 General

Trinsic offers basic local exchange service only as part of a bundle or package of telecommunications services. All packages include local service, long distance service (interstate and intrastate toll) and selected custom calling features. Voice Mail and Optional Internet access¹ may be available with some packages at an additional charge. The aforementioned services are only available as part of the bundled service offering and are not available on an individual service basis. Customers will be billed directly by the Company.

The Company provides Customers with the option of obtaining a Primary Line and Secondary Line per account:

B. Secondary Line

The Secondary Line does not automatically include or share any Custom Calling Features. Feature packages may be purchased separately.

SECTION 6 - BASIC SERVICES AND RATES OFFERED TO FORMER TRINSIC CUSTOMERS, (CONT'D.)

6.3 Network Exchange Bundled Service, (Cont'd.)

6.3.1 General, (Cont'd.)

Network Exchange Bundled Service may include the calling features listed below:

These features are offered subject to availability of suitable facilities. Certain features may not be available with all classes of services.

In the event Trinsic adds custom calling features to its Network Exchange Bundled Services, such features will be available upon the tariff effective date (where technically feasible) to all new Customers. Existing Customers will be informed of the new features availability but must contact the Company to obtain the new features. Any Service Order Charges, which would normally apply, will be waived.

Call Forwarding - Fixed, Busy Line No Answer - This feature, when activated, redirects attempted terminating calls to another Customer-specified line. Call originating ability is not affected by Call Forwarding - Fixed, Busy Line No Answer. The calling party is billed for the call to the called number. If the forwarded leg of the call is chargeable, the Customer with the Call Forwarding - Fixed, Busy Line No Answer is billed for the forwarded leg of the call. Calls cannot be transferred to an International Direct Distance Dialing number.

Caller ID with Name - Allows a Customer to see a caller's name and number previewed on a display screen before the call is answered allowing a Customer to prioritize and or screen incoming calls. Caller ID records the name, number, date and time of each incoming call - including calls that aren't answered by the Customer. Caller ID service requires the use of specialized CPE not provided by the company. It is the responsibility of the Customer to provide the necessary CPE. In areas where Caller ID with Name is not available, Caller ID, which only displays the incoming telephone number, will be substituted.

SECTION 6 - BASIC SERVICES AND RATES OFFERED TO FORMER TRINSIC CUSTOMERS, (CONT'D.)

6.3 Network Exchange Bundled Service, (Cont'd.)

6.3.1 General, (Cont'd.)

Network Exchange Bundled Service may include the calling features listed below, (cont'd.):

Call Forwarding - Variable - a Customer activated feature that automatically transfers all incoming calls from the Customer's telephone number to another dialable telephone number until the Customer deactivates the feature. If forwarded to a long distance number the Subscriber will incur the long distance charges.

Call Trace - Allows a called party to initiate an automatic trace of the last call received. Call Trace is available on a usage basis only. After receiving the call which is to be traced, the Customer dials a code and the traced telephone number is automatically sent to the Company for action. The Customer originating the trace will not receive the traced telephone number. The results of the trace will be furnished only to legally constituted law enforcement agencies or authorities upon proper request by them.

Call Blocking- Call Blocking allows Customer to block calls from different telephone numbers. A screening list is created by Customer either by adding the last number associated with the line (incoming or outgoing) or by pre-selecting the telephone number to be blocked. Callers from such numbers hear an announcement that the calling party is not accepting calls and Customer's phone will not ring. The screening list may be edited and revised at Customer's discretion.

CUSTOMERS, (CONT'D.)**

6.3 Network Exchange Bundled Service, (Cont'd.)

6.3.1 General, (Cont'd.)

Network Exchange Bundled Service may include the calling features listed below, (cont'd.):

Distinctive Ring: Distinctive Ring is a feature that allows a Customer to have up to two separate phone numbers assigned to one local exchange line. Each telephone number will provide a distinctive ring on an incoming call to allow for identification of the number being called. A distinctive call waiting tone is also provided for each telephone number, where facilities permit and Customers subscribe to Call Waiting. Distinctive Ring is offered subject to availability of suitable facilities.

VIP Alert - Allows a customer to program telephone numbers of selected callers, enabling the customer to distinguish certain incoming calls from all others by a distinctive ring tone.

Privacy Service- A feature which intercepts calls that are marked "private" and "out of area," or "unavailable" on Caller ID units. When unidentified callers dial the Subscriber's number, they will receive an announcement informing them that the party they are calling does not accept calls from unidentified callers. They will receive a prompt to identify their name or state their intention and the service will then attempt to connect the call. Only if the caller responds will the call be connected.

The Subscriber's Caller ID will display the platform number and the name of the service. If the Subscriber chooses not to take the call the caller will hear a message which states the Subscriber is unavailable.

Privacy Service is offered subject to availability of suitable facilities. This service will be provisioned on a line-by-line basis and Customers with more than one line would need to have the service activated on each line if they want the ability to intercept unknown and blocked calls to each line.

SECTION 6 - BASIC SERVICES AND RATES OFFERED TO FORMER TRINSIC CUSTOMERS, (CONT'D.)

6.3 Network Exchange Bundled Service, (Cont'd.)

6.3.1 General, (Cont'd.)

Call Waiting with Caller ID with Name - Call Waiting with Caller ID with Name provides a tone signal to indicate to a Customer already engaged in a telephone call that a second caller is attempting to dial in and allows a Customer to see a caller's name and number previewed on a display screen allowing a Customer to prioritize and or screen incoming calls. This feature permits the Customer to place the first call on hold, answer the second call and then alternate between both callers. Cancel Call Waiting (CCW) allows a Call Waiting (CW) Customer to disable CW for the duration of an outgoing telephone call. CCW is activated (i.e., CW is disabled) by dialing a special code prior to placing a call, and is automatically deactivated when the Customer disconnects from the call. In areas where Caller ID with Name is not available, Caller ID, which only displays the callers telephone number, will be substituted.

Speed Calling - This feature allows a user to dial selected numbers by means of an abbreviated code. This feature is available in either an 8 number or a 30 number capacity. The Speed Calling list can only accommodate a number consisting of 15 digits or less.

Three Way Calling - Permits the Customer to add a third party to an established connection. When the third party answers, a two-way conversation can be held before adding the original party for a three-way conference. The Customer initiating the conference controls the call and may disconnect the third party to reestablish the original connection or establish a connection to a different third party. The feature may be used on both outgoing and incoming.

Customers must actively choose this feature on a line-by-line basis. Call Waiting is not available on lines enabled for Rotary Hunting.

Three Way Calling - Permits the Customer to add a third party to an established connection. When the third party answers, a two-way conversation can be held before adding the original party for a three-way conference. The feature may be used on both outgoing and incoming.

7.5.1 Feature Descriptions

Return Call: Allows a Customer to return the most recent incoming call and, after dialing a code, hear an announcement of the last telephone number that called. If the Customer wishes to return the call right away, voice prompts will instruct the Customer to dial a certain digit and the call will automatically be returned.

Continuous Redial Permits the Customer to redial automatically the last number dialed.

Call Trace: Allows a Customer to initiate an automatic trace of the last call received. After receiving the call which is to be traced, the Customer dials a code and the traced telephone number is automatically sent to the Company. The Customer using Call Trace is required to contact the Company for further action. The Customer originating the trace will not receive the traced telephone number. The results of a trace will be furnished only to legally constituted authorities upon proper request by them.

Caller Identification Blocking: Allows the name and number of the calling party to be blocked from being transmitted when placing outbound calls.

Per Call Blocking: To activate per-call blocking, a Customer dials a special code prior to placing a call. Blocking will be activated for that outgoing call only. There is no charge for using per call blocking, and it is provided on an unlimited basis.

Per Line Blocking: When blocking is established on the line, it can be deactivated by dialing a code before each call. This one call unblock allows the name and/or number to be sent for that one call only. Customers who choose per line blocking for the first time will not be charged the nonrecurring charge. After the first time, customers requesting per line blocking will pay a nonrecurring charge for each line equipped with per line blocking. Per line blocking will be provided free to law enforcement and domestic violence agencies and individual victims of domestic violence upon request.

In such cases, the Company will call the non-published number and request permission to make an immediate connection to the calling party.

7.10 Carrier Presubscription

7.10.1 General

Carrier Presubscription is a procedure whereby a Customer designates to the Company the carrier which the Customer wishes to be the carrier of choice for intraLATA and interLATA toll calls. Such calls are automatically directed to the designated carrier, without the need to use carrier access codes or additional dialing to direct the call to the designated carrier. Presubscription does not prevent a Customer who has presubscribed to an IntraLATA or InterLATA toll carrier from using carrier access codes or additional dialing to direct calls to an alternative long distance carrier on a per call basis.

7.10.2 Presubscription Options - Customers may select the same carrier or separate carriers for intraLATA and interLATA long distance. The following options for long distance Presubscription are available:

- Option A: Customer selects the Company as the presubscribed carrier for IntraLATA and InterLATA toll calls subject to presubscription.
- Option B: Customer may select the Company as the presubscribed carrier for IntraLATA calls subject to presubscription and some other carrier as the presubscribed carrier for interLATA toll calls subject to presubscription.
- Option C: Customer may select a carrier other than the Company for intraLATA toll calls subject to presubscription and the Company for interLATA toll calls subject to presubscription.
- Option D: Customer may select the carrier other than the Company for both intraLATA and interLATA toll calls subject to presubscription
- Option E: Customer may select two different carriers, neither being the Company for intraLATA and interLATA toll calls. One carrier to be the Customer's primary intraLATA interexchange carrier. The other carrier to be the Customer's primary interLATA interexchange carrier.
- Option F: Customer may select a carrier other than the Company for no presubscribed carrier for intraLATA toll calls subject to presubscription which will require the Customer to dial a carrier access code to route all intraLATA toll calls to the carrier of choice for each call.

7.10 Carrier Presubscription, (Cont'd.)

7.10.3 Rules and Regulations

Customers of record will retain their primary interexchange carrier(s) until they request that their dialing arrangements be changed.

Customers of record or new Customers may select either Options A, B, C, D, E or F for intraLATA Presubscription.

Customers may change their selected Option and/or presubscribed toll carrier at any time subject to charges specified in 7.10.5 below:

7.10.4 Presubscription Procedures

A new Customer will be asked to select intraLATA and interLATA toll carriers at the time the Customer places an order to establish local exchange service with the Company. The Company will process the Customer's order for service. All new Customers' initial requests for intraLATA toll service presubscription shall be provided free of charge.

If a new Customer is unable to make selection at the time the new Customer places an order to establish local exchange service, the Company will read a random listing of all available intraLATA and interLATA carriers to aid the Customer in selection. If selection is still not possible, the Company will inform the Customer that he/she will be given 90 calendar days in which to inform the Company of his/her choice for primary toll carrier(s) free of charge. Until the Customer informs the Company of his/her choice of primary toll carrier, the Customer will not have access to long distance services on a presubscribed basis, but rather will be required to dial a carrier access code to route all toll calls to the carrier(s) of choice. Customers who inform the Company of a choice for toll carrier presubscription within the 90 day period will not be assessed a service charge for the initial Customer request.

Customers of record may initiate a intraLATA or interLATA presubscription change at any time, subject to the charges specified in 7.10.5 below. If a Customer of record inquires of the Company of the carriers available for toll presubscription, the Company will read a random listing of all available intraLATA carriers to aid the Customer in selection.
